MetaTwin

Your CV lists skills.
Your MetaTwin brings a workforce.

Proof of capability for the future of work.

We connect people, proof of capability, and emerging AI-enabled workforces to new opportunities.

`Your skills. Your proof. Your AI workforce. Your next opportunity.`

MetaTwin by MetaGlobe Technologies

TECHNOLOGIES

THE PROBLEM

The way we present talent hasn't caught up with the way work is changing.

Qualifications alone cannot tell an employer what someone can actually deliver. Students complete projects that rarely reach beyond the classroom. Graduates struggle to demonstrate practical experience.

Meanwhile, AI is changing how work gets done — yet professional identity still focuses on stated skills.

WHAT'S MISSING?

1. A visible record of demonstrated capability
2. Evidence of projects and the contributions made
3. A way to show AI skills, workflows and agents alongside human expertise
4. A link between demonstrated capability and real opportunities

The gap is no longer just access to education. It is the ability to prove what you can do.

THE SHIFT

The future belongs to people who can demonstrate what they can deliver.

Work is moving from qualifications and job titles toward capabilities, outcomes and problem-solving. AI accelerates this: one person can now combine knowledge with AI tools, reusable workflows and specialised agents to do work that once needed more time or a larger team.

What can you deliver with your skills — and the AI workforce you bring with you?

MetaTwin is being built for this transition.

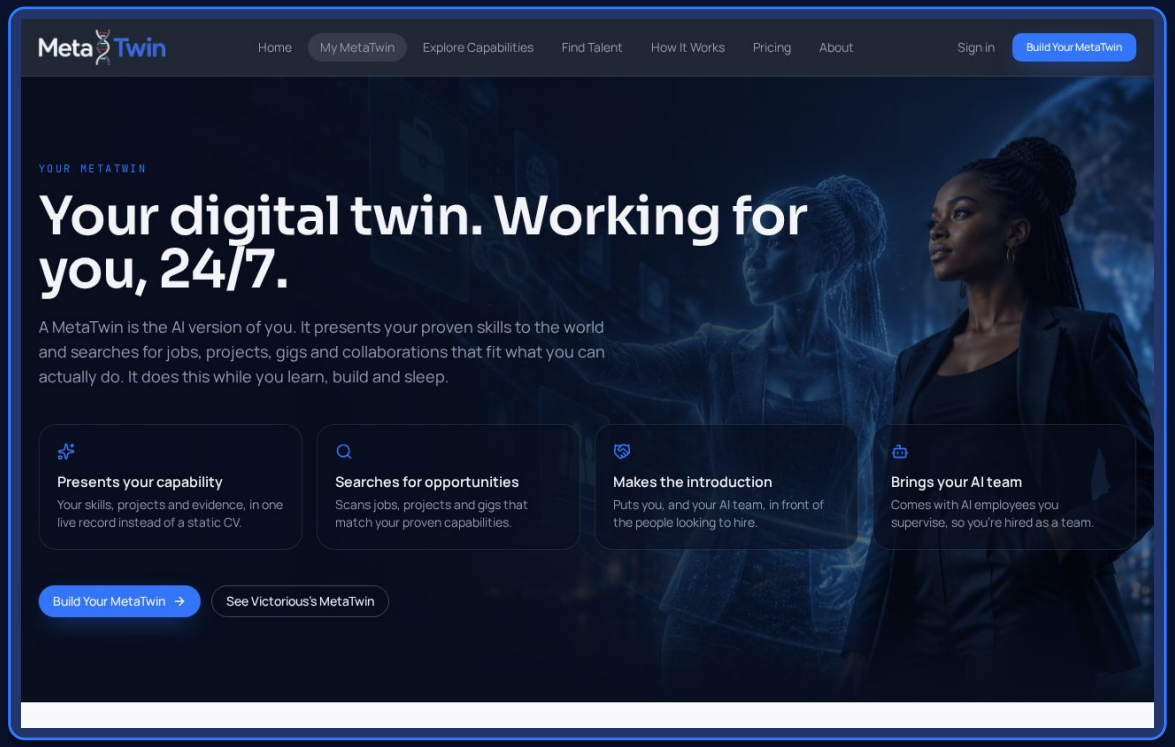

MetaTwin

THE SOLUTION

Meet your MetaTwin.

A living record of what you can do — and what you are becoming capable of doing.

- Build a professional capability profile
- Document projects, milestones and achievements
- Showcase supporting evidence of work
- Present how you use AI tools and workflows
- Build a foundation for showcasing AI agents and connecting to opportunities

Product screenshot · sample data https://metatwin.metaglobetechnologies.co.ke/

Your MetaTwin doesn't just tell your story. It helps you prove it.

MetaTwin

WHAT MAKES METATWIN DIFFERENT

Your capability is more than a list of skills.

01
Identity
Who you are, what you're learning, where you want to grow.

02
Skills
Technical, creative, analytical and professional capabilities.

03
Projects
Models, prototypes, research, designs and workflows.

04
Proof
Evidence of contributions, decisions, milestones and results.

05
AI capability
The tools, workflows and methods that extend your productivity.

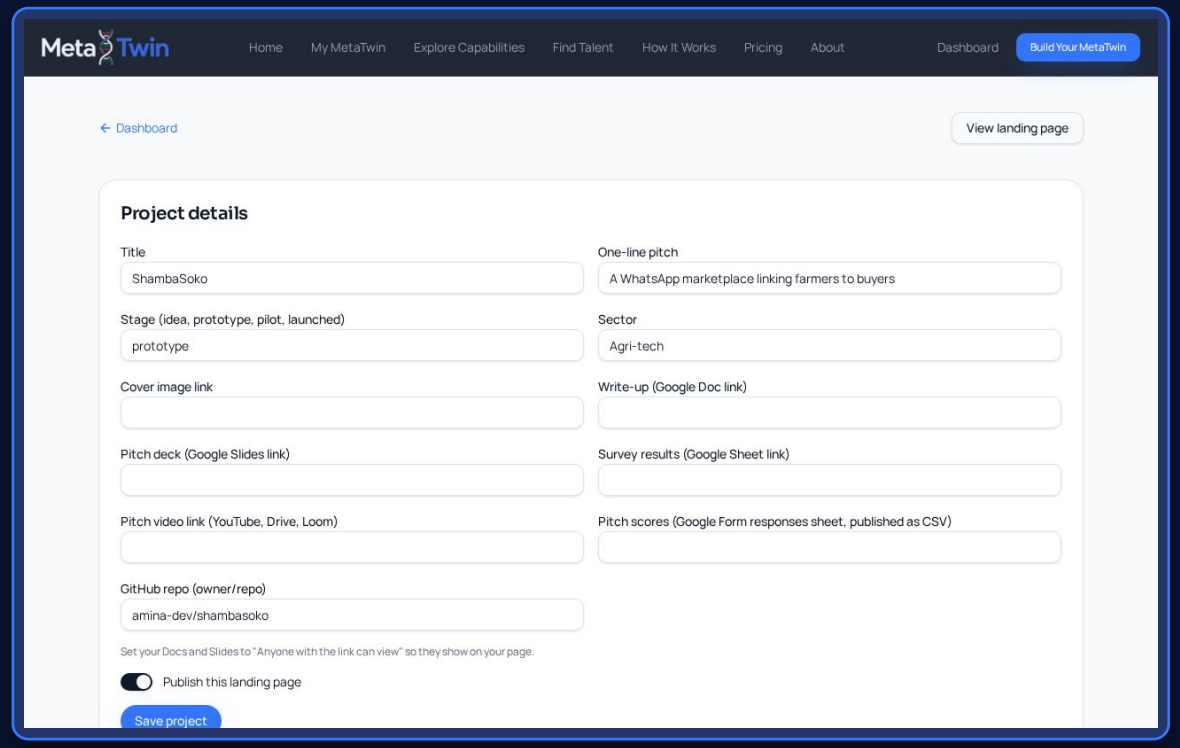

06
AI workforce
Agents you've built or configured elsewhere — what they do.

07
Opportunity
A pathway to projects, mentors, employers and more.

Not just what you know. Not just what you have done. What you can do next.

MetaTwin

FOR STUDENTS AND EMERGING TALENT

Product screenshot · sample data

Don't graduate with just a degree. Graduate with proof.

- Document projects as they progress
- Show the skills applied to each project
- Present specific contributions to teamwork
- Collect evidence of technical and problem-solving ability
- Demonstrate responsible, effective AI use
- Build a professional profile before entering the job market

Build your proof while you build your future.

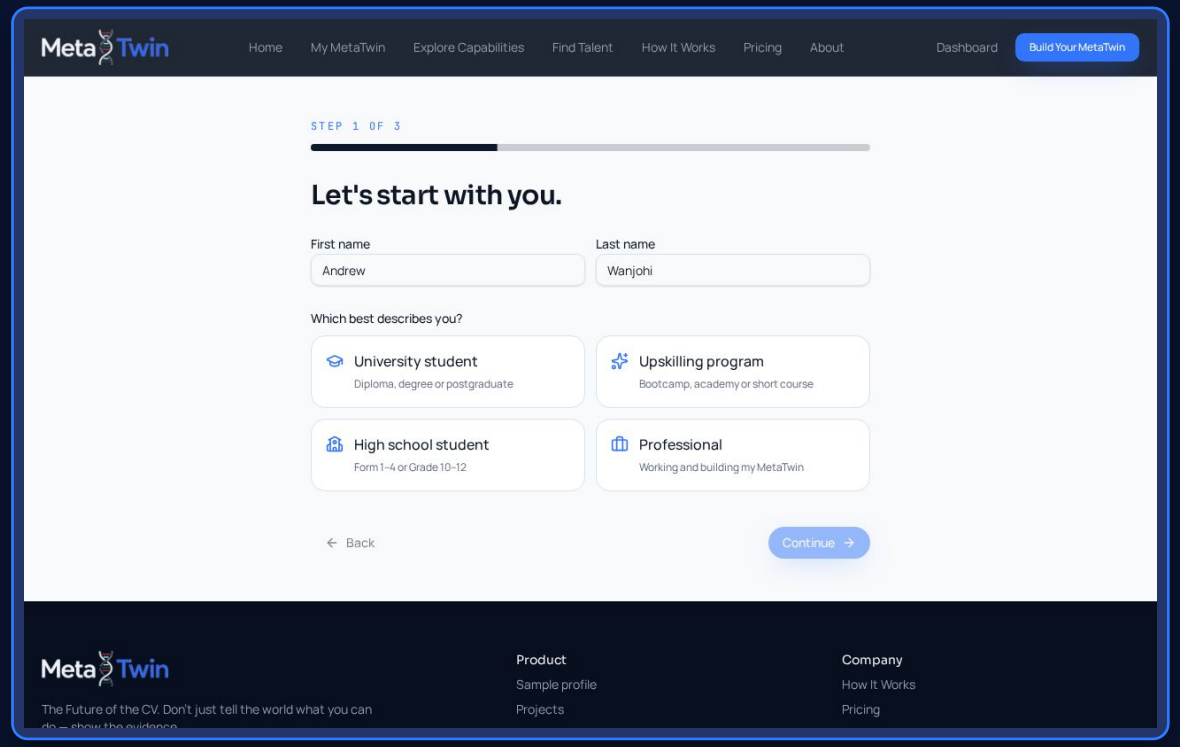

MetaTwin

FOR UNIVERSITIES AND TRAINING INSTITUTIONS

Turn student projects into pathways to opportunity.

Capstones, research, prototypes and innovations often remain hard for industry to discover. MetaTwin gives student capability a visible professional presence.

- Structured student capability profiles
- Easier showcasing of projects and contributions
- Career readiness and portfolio development
- Visibility for capstones, research and innovation
- Connections to industry challenges and collaborators

Product screenshot · sample data

From learning outcomes to visible capability. From campus projects to real-world opportunity.

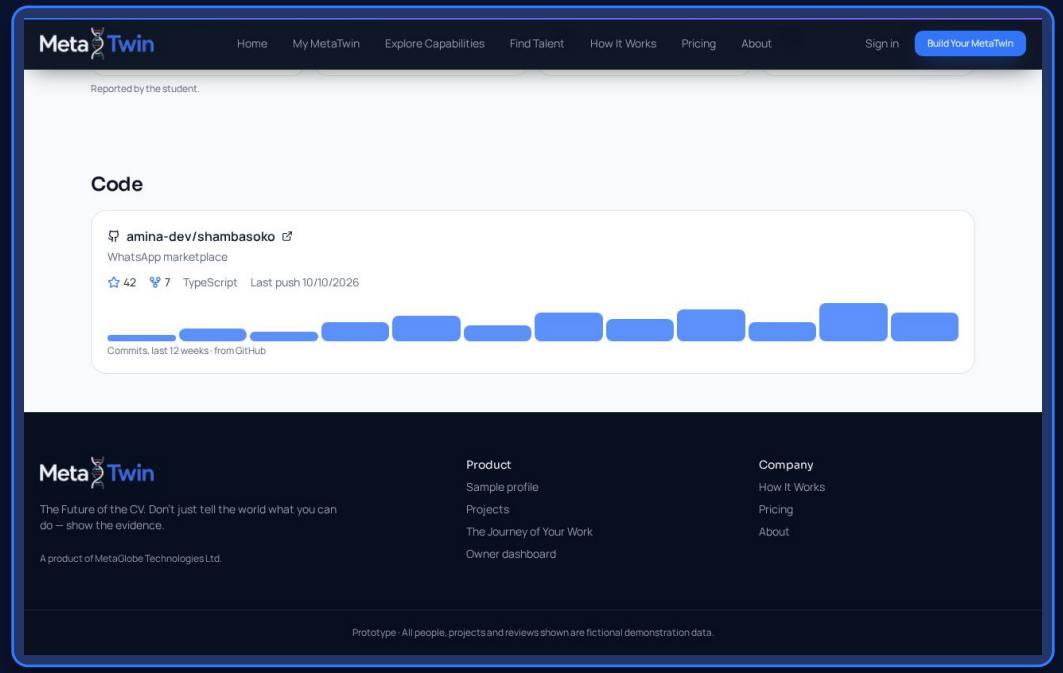

MetaTwin

FOR EMPLOYERS AND INDUSTRY

Find capability. Not just candidates.

Organisations need people who can solve specific problems, use relevant tools, collaborate and produce results. The goal is not to eliminate CVs — it is to add context.

1. **Discover people** Profiles with skills, projects and evidence.
2. **Understand the proof** Artifacts, contributions, milestones.
3. **Identify capability** Match work to specific challenges.
4. **Explore AI-enabled work** How people use workflows and agents.
5. **Connect to demand** Projects, internships, employment.

Product screenshot · sample data

Make talent discoverable through demonstrated capability — and connect it to actual demand.

MetaTwin

THE HUMAN + AI WORKFORCE

The next professional profile may show more than one worker.

The individual

Expertise, skills, experience and demonstrated work.

The AI workflow

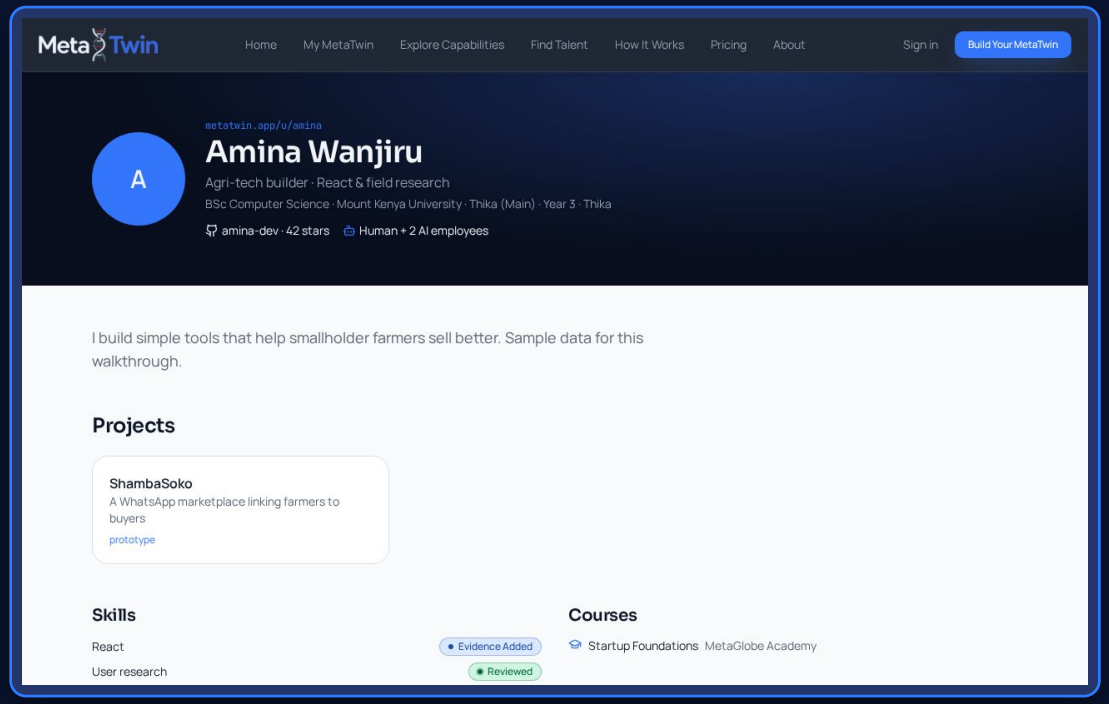

How they use AI tools and repeatable processes.

The AI agents

Configured with external tools, with clear functions and limits.

The work

Tasks that benefit from human expertise plus AI execution.

Product screenshot · sample data

MetaTwin is a platform where people showcase their skills, prove their capabilities, present their AI workforce, and connect to opportunities.

People bring expertise. AI can extend execution. MetaTwin aims to connect both to opportunity.

MetaTwin

WHAT A METATWIN LOOKS LIKE

From a profile to proof of capability.

Illustrative example. Amina N. is a fictional student profile.

A

Jabez N

Built Environment Student · Digital Design · AI Workflows

Interested in digital modeling, design coordination, problem-solving and applying AI to project workflows.

NEXT OPPORTUNITY

Industry challenge · Mentor feedback · Project collaboration · Internship consideration

PROJECT · DIGITAL BUILDING MODEL

- Digital model and supporting files
- Design iterations and documented decisions
- Project milestones and progress
- Demonstration of the final output

CAPABILITIES DEMONSTRATED

Digital modeling · Spatial reasoning · Problem-solving · Design communication · Documentation

AI CAPABILITY · ILLUSTRATIVE

Research Assistant

Built an AI Research Assistant that gathers, analyses, and organises research to support informed decision-making.

Documentation Workflow
Structures project notes and drafts documentation for review.

Here is what I worked on. What I contributed. The evidence. How I use AI. What I'm ready for next.

MetaTwin

WHO METATWIN SERVES

One capability layer. Multiple stakeholders.

Students and graduates

Build profiles, document projects, show readiness.

Professionals

Make experience and AI-enabled capability visible.

Universities and institutions

Portfolios, project showcases, industry links.

Employers and industry

Explore demonstrated capability that fits real needs.

Innovation hubs and incubators

Help teams document progress and find connections.

AI builders and agent owners

Showcase AI agents, highlight their capabilities, and connect them to opportunities.

A shared layer for capability, evidence, and opportunity.

MetaTwin

BUSINESS MODEL AND PRICING

Start with individual capability. Scale through institutions.

BASIC

KES 2,000 / year

- Professional profile
- Skills and interests
- Projects and achievements
- Supporting evidence

GUIDED

KES 5,000 / year

- Everything in Basic
- Guided development support
- Four individual Builder Sessions per year*

BUILDER

KES 10,000 / year

- Everything in Guided
- Project-planning and development tools
- Calendars, milestones, 90-day plans, reviews — coming soon

CAMPUS

Custom pricing

- Student capability profiles
- Cohort onboarding
- Capstone and innovation showcases
- Industry engagement

* Subject to mentor availability and booking rules as stated in the pricing offer. Future expansion (institutional programmes, sponsored challenges, mentoring partnerships, marketplace or AI-agent fees) are opportunities, not established revenue.

Subscriptions establish the record. Guidance strengthens the proof. Campus partnerships scale adoption.

MetaTwin

GO-TO-MARKET STRATEGY

Start with student projects. Prove the value. Expand.

1. **Establish institutional partnerships**
2. **Onboard an initial cohort**
3. **Build a portfolio of proof**
4. **Bring industry into the process**
5. **Validate willingness to pay**
6. **Expand based on evidence**

INITIAL VALIDATION PRIORITIES

- Can students create and maintain useful capability profiles?
- Does project evidence help industry understand their capabilities?
- Will individuals pay for additional guidance?
- Will institutions pay to support cohorts?
- Which industry needs are best served by the platform?

Partner with MetaTwin the better way for people to demonstrate what they can do.

MetaTwin

THE VISION

Every learner has a record of what they can do. Every project has a path to its next opportunity.

MetaTwin aims to become a capability layer that connects people to their skills and projects, learning to opportunity, projects to collaborators and industry, human expertise to AI-enabled workflows — and capabilities to the demand for work.

Don't just tell the world what you know. Show the world what you can build.

MetaTwin

THE INVITATION

The future of work needs a better way to see capability.

Students and emerging professionals

Bring a project. Build your profile. Start documenting your capability.

Universities and institutions

Explore a pilot for a cohort, capstone programme, innovation club or career-readiness initiative.

Employers and industry partners

Help define the skills, evidence and project outcomes that matter at work.

Mentors and innovation partners

Help people strengthen projects and connect capability to opportunity.

OUR NEXT STEP

Pilot MetaTwin with a focused cohort, measure the value of capability profiles and project evidence, and build partnerships that connect learning to real-world demand.
